

The Department of Pharmacology is seeking applicants for an Instructor position. The candidate will collaborate with the Principal Investigator on sponsored projects. Perform research with molecular cloning and site-directed mutagenesis, protein purification, chromatin immunoprecipitation (ChIP) and electrophoretic mobility shift (EMSA) assays. Expertise also needed in cell culture: isolation of endothelial and bone marrow cells, ectopic expression of proteins, immunofluorescent staining, flow cytometry, amplification of adenoviral particles. Candidates must have PhD or MD/PhD degree with strong experience in studying cross-talk between microtubule cytoskeleton and VE-cadherin-mediated adhesions in microvascular endothelial cells. Successful candidate should have an excellent publication record. Ability to learn new research technologies, work independently and self motivation is required. For fullest consideration apply via the following link: <https://jobs.uic.edu/job-board/job-details?jobID=132671>

The University of Illinois at Chicago is an Affirmative Action/Equal Opportunity Employer. Minorities, women, veterans and individuals with disabilities are encouraged to apply. The University of Illinois conducts background checks on all job candidates upon acceptance of contingent offer of employment. Background checks will be performed in compliance with the Fair Credit Reporting Act.
